

# Airway and Skeletal Growth and Development: Etiology and Interventions

May 15, 16 OR September 25, 26 2020 – Seattle, WA

## Course Objectives:

- Understand skeletal growth and development and how airway issues at early ages can alter jaw growth
- How to co-diagnose airway and sleep issues in children and adults. Learn the basics behind sleep apnea including common terminology, how the diagnoses are made, and what this means for your patients
- Learn interdisciplinary approaches to treatment including how and when to work with sleep medicine, ENT, myofunctional therapy, pediatric dentistry, OMFS, and orthodontics
- An in-depth breakdown of treating various skeletal issues including: underbites, overbites, crossbites, and open bites
- Exploring various treatment modalities for children and adults including different expansion protocols
- Discussions surrounding controversial topics such as extractions, open bites, and root resorption
- Hands on MSE module including TAD placement (Maxillary Skeletal Expander by Dr. Won Moon) - Materials supplied by Great Lakes Orthodontics

Dr. Rebecca Bockow is a dual trained orthodontist and periodontist –one of only a handful in the country. Dr. Bockow graduated from the University of Washington School of Dentistry and practiced as a general dentist for two years. She completed a dual-specialty program combining Orthodontics and Periodontics at the University of Pennsylvania. She is a board certified orthodontist and periodontist.

Dr. Bockow lectures internationally on periodontics, orthodontics, interdisciplinary orthodontics, airway, and skeletal growth and development. She contributes to multiple professional journals as an author and editor. Dr. Bockow is also resident faculty at Spear Education.
